projects.

1. Aeron (ARN) 337.29%

Aeron has started the year with a strong performance. Since January 3, the cryptocurrency is enjoying triple-digit gains every day. It touched \$4.96 on Friday from \$1.1257 a day before. The highest price was \$1.3116 and lowest of \$0.9243 for January 3-4. The open was \$0.9388. The case of ARN may be a previously underrated coin exploding:

3. Nexus (NXS) 112.96%

Nexus's big hit came after it announced a partnership with space company Vector to host the blockchain technology company's decentralized crypto currency on a satellite. The task is planned to be accomplished in the GalacticSky platform of Vector, which is considered as a potential SpaceX competitor. NXS grew to \$8.85, almost doubling overnight.

4. KickCoin (KICK) 108.29%

Subscribe

KickCoin is a consistent mover in the early days of this year and traded \$0.170558 on Friday. Fans of KickCoin are confident the digital currency will be one of the most promising this year. The coin will be accepted and used by the projects that are launched on the KICKICO platform (as well as by all its partners). The coin's trading, however, is mostly limited to Ukrainian-based exchange EXMO, famous for the kidnapping of its director, **Pavel Lerner**.

5. AirSwap (AST) 98.47%

AirSwap is a decentralized token exchange based on the Swap protocol. This digital currency is currency trading at \$1.21 after closing at \$0.6184 on Thursday. Swap provides a decentralized trading solution based on a peer-to-peer design. The design solves two problems encountered in a peer-to-peer trading environment: counterparty discovery and pricing suggestions.

6. Dent (DENT) 87.74%

Number 47 in ranking based on market capitalization, Dent continued its upward stride and traded at \$0.068222. Dent is a tokenized mobile data industry, creating a worldwide marketplace on Ethereum blockchain.

Subscribe

7. Agrello (DLT) 84.87%

In late December Agrello entered into a partnership with Estonian decentralized mobile security to develop a hardware-based cybersecurity solution for digital identities. The agreement aims to create self-sovereign identities that are protected by hardware, offering simpler and safer solutions for users online. DLT traded at \$1.25.

8. SpankChain (SPANK) 85.70%

SpankChain is a contentious and risky coin related to the adult industry. Still, it is having its 15 minutes of fame, trading at \$0.34 on Cryptopia.

9. TRON (TRX) 79.76%

The top mover the previous 48 hours, Tron dropped eight notches to ninth place the last 24 hours and traded at \$0.228717. **TRX** remains in the top seven ranking of cryptocurrencies, based on CoinMarketCap data in terms of market capitalization.

Japan's entertainment giant **DMM Group** unveiled two big-ticket projects this weekend that will establish the Tokyo-headquartered company as one of Japan's leaders in the blockchain space.

DMM Group, which also operates the popular e-commerce website **DMM.com**, is set to launch on January 11 a cryptocurrency exchange called DMM Bitcoin.

The company said about the launch of the cryptocurrency exchange:

Subscribe

“DMM Bitcoin will launch a new service site for virtual currency trading on January 10, 2018, and we plan to start accepting account opening applications on January 11.”

In the recent past, DMM Group operated a small digital currency trading platform called the Tokyo Bitcoin Exchange Inc. The nation’s market regulator, the Japanese Financial Services Agency (FSA), issued DMM license for the platform on December 1. It has since been renamed DMM Bitcoin and suspended operations pending its formal re-launch.

The exchange will initially launch with seven cryptocurrencies, including Bitcoin (BTC), Ether (ETH), Nem (XEM), Ripple (XRP), Litecoin (LTC), Ethereum classic (ETC), and Bitcoin cash (BCH). Spot trading is available for trading pairs – BTC/JPY, ETH/JPY and ETH/BTC. Leverage of 5x is available for 14 trading pairs.

DMM Creates Crypto Mining Lab

On Thursday (January 4) DMM **announced** the creation of a research and development (R&D) specialty lab for cryptocurrency mining called

A translation of a company press release said that the DMM Mining Labo will conduct research on a wide range of spectrum of mining machines types, testing methodologies to achieve an optimal balance between their computing power and their electricity consumption. The company stated:

"In the foreseeable future, the goal of DMM Mining Labo is to achieve the highest computing power per unit for its machines. Achieving this goal will allow DMM to maximize its shared interests with its investors and potential customers for the cloud mining services that DMM will provide. In the long term, DMM is exploring options for the manufacture of its original mining machines, extending its operations beyond the use of ready-made units."

DMM Group is a Japan-based electronic commerce and Internet company with a diversified group of businesses that includes online shopping and video on demand service. The company manages DMM.com, an online entertainment site that allows users to purchase goods and services like e-books, games,
